

Nutrient Dynamics in between sediment and water column: Fluxes

Ramin Nasrabadi; Mitch Hogsett and Ramesh Goel*

July 19th, 2012

Nutrient Concentration change

- Measured using in-situ square chambers

_ Chamber's dimensional features:

Height: 3 feet

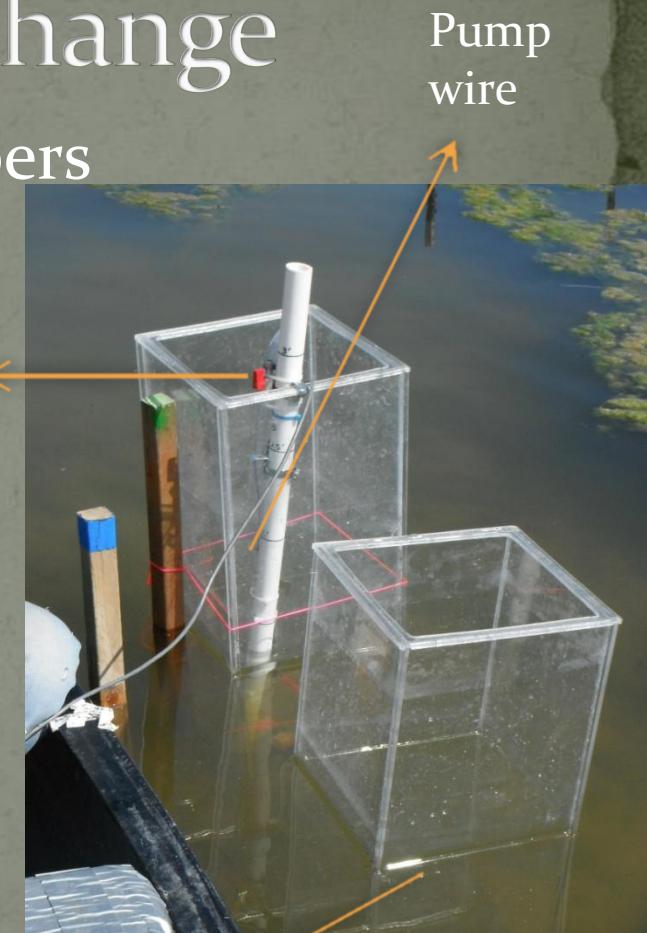

Wall thickness: $\frac{1}{4}$ inch

Cross sectional area: 100 inche²(10"×10")

Control
Chamber
(close bottom)

Valve

Sediment
Chamber
(open bottom)

Pump
wire

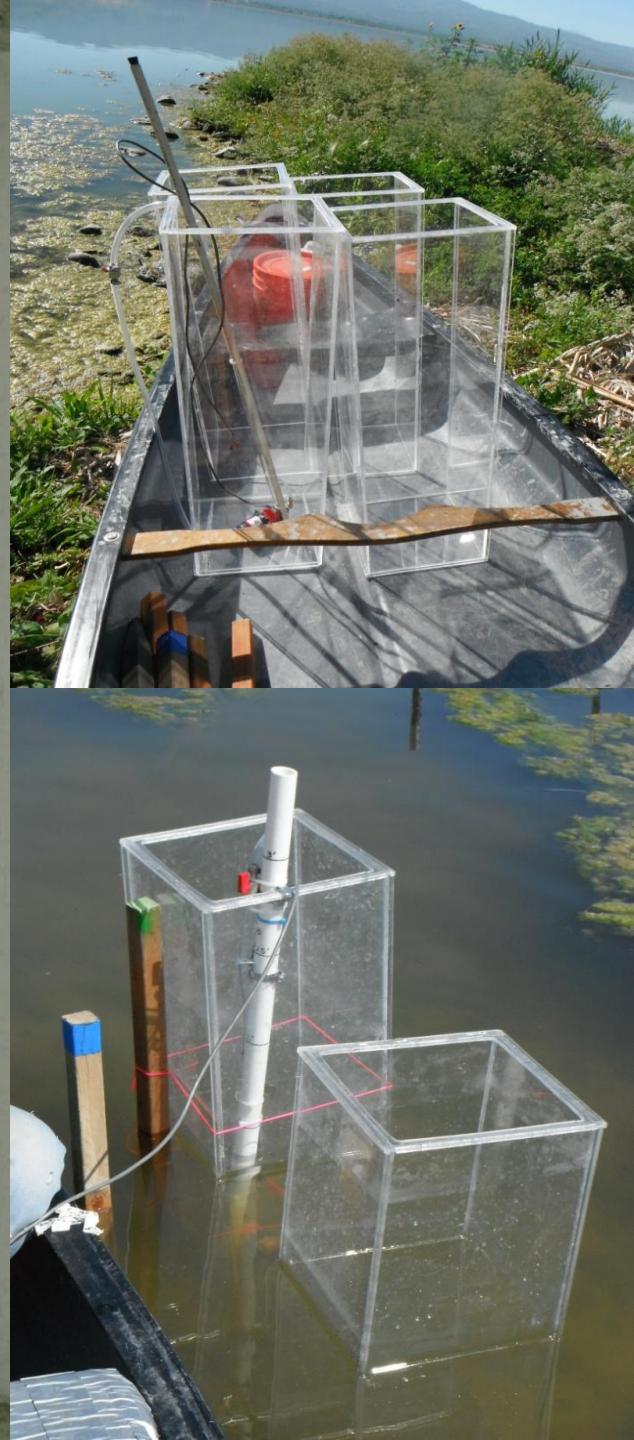

Analytical Methods

In the Field:

- _ Water samples filtered through 0.45 micron and stored in ice cooler
- _ pH, DO and temperature recording

In the Lab:

- _ Dissolved Nutrients (Ammonia, Nitrate, Nitrite, phosphate)
- _ DOC
- _ TSS-VSS
- _ TP (Total Phosphorous)

Results
